Professional Summary

ISTQB Certified Automotive Software Test Engineer specializing in Software Quality Assurance, Automotive Software Testing, Validation, & Verification, and Test Automation. Currently working at Robert Bosch GmbH on Global Vehicle Communication Interface (GVCI) and Remote Diagnostic System (RDS) projects, focusing on automotive software validation, DCU product testing, calibration testing, and Tosca-based automation development. Experienced in building automation solutions from scratch, performing requirements-based, functional, regression, integration, and system testing, and supporting defect analysis, test documentation, and quality assurance activities within Agile Scrum environments.

Core Competencies

Automotive Software Testing Validation & Verification Requirements-Based Testing Functional Testing Regression Testing System Testing
Manual Testing Test Automation Calibration Testing DCU Testing Defect Management Agile Scrum Tricentis Tosca Test Documentation
Software Quality Assurance Remote Diagnostic System GVCI RDS System Testing

Professional Experience

Robert Bosch GmbH

Automotive Test Automation Engineer

Jan 2025 – Present

Plochingen, Germany

- Contributing to **Global Vehicle Communication Interface (GVCI)** automotive software testing and validation activities.
- Supporting **Remote Diagnostic System (RDS)** projects through manual and automated test execution.
- Designing and developing **Tosca automation solutions from scratch**, including reusable modules and scalable test suites.
- Executing requirements-based, functional, regression, integration, and system testing activities.
- Performing validation and verification of **Bosch DCU 150 and DCU 220** products.
- Conducting calibration testing and supporting software quality assurance activities.
- Investigating defects, analysing test results, and preparing comprehensive test documentation.
- Collaborating with cross-functional Agile Scrum teams to ensure software quality and release readiness.

Mixed Reality Lab, Frankfurt University of Applied Sciences

Junior AR Developer

Aug 2023 – Dec 2024

Frankfurt, Germany

- Developed Augmented Reality applications using Unity, C#, and Microsoft HoloLens 2.
- Supported software design, implementation, testing, and technical documentation activities.

EPERI GmbH

Junior Software QA Engineer

Apr 2023 – Mar 2024

Darmstadt, Germany

- Performed manual, API, automation, and regression testing activities.
- Developed and executed automated test cases using Tricentis Tosca.
- Created test documentation and supported defect management processes.
- Worked in Agile Scrum teams to support software quality assurance initiatives.

SIXSENTIX Deutschland GmbH

Junior Software QA Engineer

Apr 2022 – Mar 2023

Frankfurt, Germany

- Executed manual and automated testing activities for enterprise software applications.
- Developed and maintained Tosca automation test cases.
- Supported test planning, execution, defect reporting, and release validation activities.

Education

Master of Science in High Integrity Systems

Frankfurt University of Applied Sciences, Germany

2022 – Present

Bachelor of Science in Software Engineering

Daffodil International University, Dhaka, Bangladesh

2016 – 2020

Bachelor Thesis

Field: Software Quality Assurance & Testing

Combinatorial Test Techniques: Artificial Bee Colony Algorithm for Test Suite Generation

[Thesis Link](#)

Certifications

- ISTQB Foundation Level
- Kovair Software Ltd: SDLC
- SQAT Bangladesh: Symposium QA

Projects

Amazon Shopping Cart System

Comprehensive testing and bug reporting for an open-source shopping cart system. Focused on test execution, issue identification, reporting quality, and QA documentation.

[Project Link](#)

HRM System

Created test documentation, test cases, execution plans, and testing reports for a Human Resource Management System. Covered functional scenarios, test planning, and QA reporting.

[Project Link](#)

Time-Series Analysis on ECG Data

Performed machine learning-based ECG signal analysis for classification and prediction. Worked with data analysis, model evaluation, and result interpretation.

[Project Link](#)

Containerisation of Web Application and Hybrid Cloud Deployment

Worked with Docker and Kubernetes for containerisation, deployment preparation, and hybrid cloud environment setup.

[Project Link](#)

Real-Time Mask Detection

Developed a deep learning-based real-time mask detection system for computer vision-based safety monitoring.

QA Background

Experienced in Software Quality Assurance, Test Automation, and Validation & Verification across automotive, enterprise, and augmented reality domains. Strong foundation in SDLC, STLC, Agile Scrum, test planning, test design, test execution, defect management, regression testing, integration testing, system testing, API testing, and test documentation. Hands-on experience with Tricentis Tosca, manual testing, automation testing, quality assurance processes, and software release validation. Passionate about delivering reliable, scalable, and high-quality software solutions through structured testing methodologies.

Relevant Strengths

- Automotive software validation and verification experience within Robert Bosch GmbH.
- Hands-on experience with GVCi and Remote Diagnostic System (RDS) projects.
- Practical experience in DCU 150 and DCU 220 product testing and calibration validation.
- Developed Tosca automation solutions from scratch, including reusable automation modules and test suites.
- Strong knowledge of manual testing, automation testing, regression testing, and requirements-based testing.
- Experience working within Agile Scrum teams and collaborating with cross-functional stakeholders.
- Academic and professional background spanning software engineering, quality assurance, and high-integrity systems.
